PROFESSIONAL SUMMARY

Results-driven finance professional with an MS in Finance from Stevens Institute of Technology and experience in financial modeling, DCF valuation, equity research, and data analysis. Proficient in Python, Tableau, Bloomberg Terminal, and Excel. CFA Level I Candidate with strong expertise in investment analysis and corporate finance.

EXPERIENCE

Volunteers of America – Greater New York | Staff Accountant

January 2025 – April 2026 | New York, NY

- Delivered quarterly financial analysis and variance reports on \$200K+ grant portfolios, identifying spending trends and surfacing actionable insights for program leadership
- Built a process automation tool with Microsoft Power Automate, cutting manual document processing time by 85% and enabling faster close cycles
- Conducted reconciliations on payment records in Microsoft Business Central, resolving discrepancies and reducing outstanding issues by 30% while maintaining 99%+ accuracy
- Supported budgeting and forecasting by collaborating cross-functionally with program managers to track actuals against plan

Accenture | Senior Process Associate

August 2019 – July 2022 | Mumbai, India

- Automated financial workflows using advanced Excel macros, achieving 90% efficiency improvement and \$1,100 in quarterly cost savings
- Maintained 100% accuracy processing 500+ invoices weekly across 25 queues, consistently exceeding productivity benchmarks at 124% of target
- Produced analytical dashboards visualizing productivity, errors, and team performance metrics; supported in Unonshore clients with data-driven updates

Money Honey Financial Services | Financial Advisor

July 2018 – November 2018 | Mumbai, India

- Managed a \$750K diversified portfolio across equity, fixed income, and alternative instruments, generating an 8% ROI through disciplined risk assessment and strategic asset allocation
- Achieved 100% client retention across 200+ clients by delivering tailored investment strategies and financial plans aligned with individual goals
- Advised clients on mutual funds, fixed deposits, debentures, and SIPs; built detailed financial reports and presentations in Excel and PowerPoint

EDUCATION

Stevens Institute of Technology | Master of Science, Finance

September 2022 – May 2024 | Hoboken, NJ

GPA: 3.86/4.00 | Relevant Coursework: Financial Statement Analysis, Corporate Finance, Investment Management, Portfolio Construction, Trading Analytics, Quantitative Hedge Fund Strategies, Derivatives, Fixed Income, Econometrics, Data Visualization, Python for Finance, Bloomberg & Thomson Reuters

ACADEMIC PROJECTS

Investment Decision-Making | Python · Tableau · yfinance

- Analyzed technical and fundamental indicators, offering actionable insights for informed decision-making based on Apple, S&P 500, and NASDAQ at close prices. Leveraged Tableau visualizations correlate key indicators, empowering strategic investment decisions

AMD Equity Research – DCF Valuation Model | Python · Anthropic API · Excel · yfinance · SEC EDGAR

- Built a three-scenario DCF (Bear/Base/Bull) for AMD using live data from yfinance and SEC EDGAR XBRL, with WACC derived via CAPM. Leveraged AI-powered financial analysis tools (Anthropic/Claude financial-services plugin) to accelerate model construction and assumption validation
